Subject Index

absolute pitch: *see* Pitch
acetylcholine 19
acoustic trauma: *see* Trauma
across-channel processes 271, 417, 479;
  see also Masking and profile analysis
actin 27
adaptation 279, 289, 297
adaptive thresholding 429
adenosine triphosphate 19, 53
adjustment 305
aging 179
amphibian 141
amplitude discrimination: *see* intensity discrimination
amplitude modulation: *see* Modulation
audiometry 581, 625
auditory cortex: *see* cortex
auditory filter: *see* Filter
auditory nerve 133, 159, 189, 197, 231, 279, 315, 381, 447

bandwidth 397; *see also* Filter
basilar membrane 71, 85, 93
basilar papilla 197
behaviour 159, 251, 625
binaural hearing 263, 507, 513, 521, 531, 539, 547, 555, 563, 635
bird 197, 353, 407
brainstem responses 625, 635

Ca^{2+} channel 53
calcium imaging 19
centrality 547
chopper cells 495
chroma: *see* tone chroma
click response 85, 607
Cochlea 3, 27, 45, 53, 71, 85, 93, 101, 117, 581, 589
  cochlear mechanics 27, 71, 85, 93, 581
  cochlear microphonic 117
  cochlear model 93
cochlear nerve fibres: *see* auditory nerve
cochlear nucleus 231, 251, 389, 447, 495, 599
coding efficiency 315
coincidence detection 447
colliculus: *see* inferior colliculus
combination tone 117
communication 331
comodulation masking release: *see* Masking
complex signals 223, 231, 315, 373, 381, 429, 447
computer model: *see* model
concurrent vowels 429
consonant 455, 463
cortex 625
cortical lattice 27
critical band 407
cross-correlation 547
cupula 107

Deiter's cell 53
deprivation 625
dichotic listening 223
distortion 117
detection efficiency 179, 323, 373

discrimination: *see* frequency discrimination and intensity discrimination
duration 279, 323, 471
dynamic range 251

echidna 101
echo 531, 555
efferent interaction 297, 571
emissions: *see* Otoacoustic emissions
envelope 331, 337, 363
estimation theory 563
EWAIF model 363
excitation pattern 617
excitotoxicity 589

Filter 159, 171, 179, 429
  auditory filter 171, 179, 429
  comb-filtered noise 159
  gammatone auditory filterbank 429
fluctuation strength 331
formant 429, 463
frequency discrimination 487, 507
frequency modulation: *see* Modulation
frequency selectivity 45, 71, 151, 159, 179, 521, 607
frequency transition 345
frog 141
fundamental frequency 231, 607

gammatone auditory filter: *see* Filter
gerbil 61, 189
glutamate 589
guinea pig 117, 607

Hair cells 3, 19, 27, 35, 45, 71, 93, 101, 125, 197, 589
  inner hair cells 71, 101, 584
  outer hair cells 3, 19, 27, 35, 45, 71, 93, 101
  outer hair cell motility 3, 27, 35, 93
  short hair cells 197
harmonic series 215, 223, 231
hearing loss 513, 599, 617, 625
hydrophone 109

identification 455, 463
image perception 417, 487
impairment: *see* hearing loss
impulse response 85, 607
indo-1 fluorescence 53
inferior colliculus 241, 263, 495
inharmonic spectrum 215, 223
inner hair cell: *see* Hair cells
inner spiral sulcus 93
intelligibility 513
intensity discrimination 251, 263, 279, 289, 363, 381, 471, 487, 507
interaural time discrimination 539, 547
interspike intervals 207
ion channel 3
ischemia 589

K^+ channel 61

lateral cisternae 27
lateral line 109
lateralization 547, 635
level discrimination: *see* intensity discrimination
level uncertainty 337
lidocaine 61
linking process 417
lizard 151
localization 389, 531, 555, 563
loudness 289, 297, 305, 617, 625
loudness contour 305

Masking 159, 171, 271, 289, 337, 479, 507, 513, 617
  comodulation masking release 429, 479, 521
  masking-level difference 521
  masking release 271
  upward spread of masking 571
memory 305

midbrain 241
middle ear 141
mistuning 223
model 133, 279, 363, 429, 447, 455, 495, 539, 547, 607
Modulation 331, 345, 353, 397, 487
  amplitude modulation 331, 353, 487
  frequency modulation 345, 353, 397
  frequency modulation selectivity 397
  modulation detection interference 487
  modulation transfer function 331, 353
molecular motor 35
monaural-diotic difference 571
multi-directional field 555
multiple looks 323
multiple sclerosis 635
musical pitch: *see* Pitch

neural plasticity: *see* plasticity
neuromast 109
neurotransmission 589
Noise 159, 215, 331, 337, 389, 571, 599
  band-stop noise 159
  comb-filtered noise 159, 215
  frozen noise 571
  narrow-band noise 331, 337
  noise-induced hearing loss 599
  noise trauma: *see* trauma
  notched noise 389
nonlinearity 35, 85, 125, 171, 189

off-frequency components 271
olive: *see* superior olive
onset response 231, 263, 447
oscillator 125
Otoacoustic emissions 125, 151, 297, 581
  distortion-product otoacoustic emissions 151
  spontaneous otoacoustic emissions 125
outer hair cell: *see* Hair cells
overshoot 271

patch clamp 19
periodicity 241, 429, 447
phase-locking 381
pigeon 197
Pitch 207, 215, 223, 241, 495
  absolute pitch 207
  musical pitch 207
  pitch averaging 215
plasticity 599, 625
precedence effect 531, 555
presbycusis 581
primary auditory cortex: *see* cortex
profile analysis 363, 373, 381, 397, 429, 471, 479

quinidine 61

reaction time 625
receptor potential 3
revcor function 189
room acoustics 531

scene analysis 417
selective attention 495
self-exciting point-process 133
sensorineural hearing loss: *see* hearing loss
sensory cells 53; *see also* Hair cells
signal detection theory 279
sound localization: *see* localization
spatial hearing: *see* binaural hearing
spectral asynchrony 471
spectral dominance 215
spectral gradient 397
spectral shape: *see* profile analysis
spectral symmetry 397
spectral weight 373
speech 133, 231, 407, 429, 455, 463, 513
spike count 323

starling 353
stellate cells 495
straightness 547
stream segregation 417
superior olive 539
supporting cell 53
sustained response 263
syllable 133

tachyglossus 101
tectorial membrane 71
temporal analysis 241
temporal envelope: *see* envelope
temporal fine structure 337
temporal integration 323, 429, 447
temporal resolution 353, 539
tone chroma 207
tone decay test 297
tonotopy 45, 241, 625
transduction 3, 589
transfer function 85, 331
Trauma 581, 607
    acoustic trauma 581
    noise trauma 607
traveling wave 71, 85
tuning curves 151, 159
tunnel of Corti 93
tympanic membrane 141

verapamil 61
vestibular labyrinth 61
vowel 407
